RADIATOR FINS

The core originally fitted to the M.G. J2, was the hexagon film type size 16½" high x 12" wide x 75mm thick. Vintage Radiators (see technical article No.79 for address) says that they can supply exchange stock at £124 sterling (January 1982 price) Shipping air freight would be approx. £28.00 or surface mail £20.00. (per Vintage Radiators)

(If the reproductions of printed material are 100% (full size), then the "rubbing off core" above is full size of hexagon of core.
