BRAKE LEVER GREASER

The greaser on all four brake levers is made of brass and the cap, which is filled with grease will lubricate the brake lever by advancing it one turn per lub instructions.

The greaser is available from the spare suppliers in England.

BRAKE PEDAL AND MOUNTING BRACKET

The brake pedal and bracket assembly bolts to the inside of the right chassis rail.

For those who have hydraulic brakes and are questioning if they still have the original pedal and mounting bracket, the picture below is what the assembly looks like.
