### FOOTBRAKE ADJUSTMENT PLATE

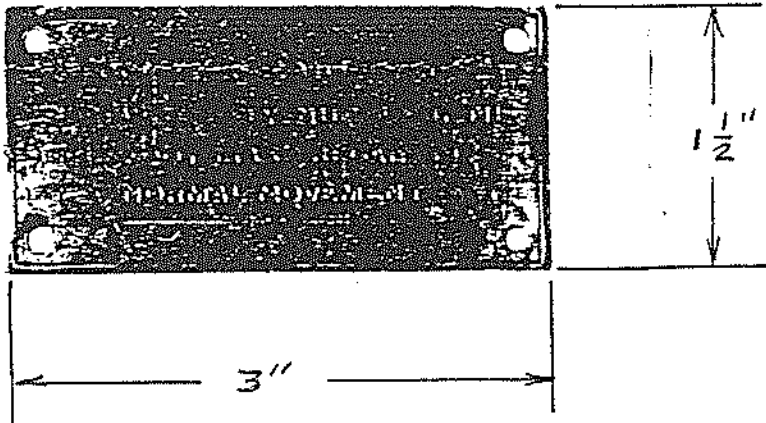

One of the information plates that most of us are missing is the footbrake adjustment plate and thanks to Mr. Lee, I now have a copy of the actual plate. Mr Lee says that a an engraving shop can construct a new replacement quite easily.

The plate was brass with black lettering.

In case my reproduction of the copy of the original does not come out very well, the lettering is:

#### FOOTBRAKE ADJUSTMENT

SCREW THE FLY-NUT UP UNTIL  
THE FOOTBRAKE REGAINS ITS  
NORMAL MOVEMENT

$\frac{3}{32}$  LETTERING
