### THE PROBLEM WITH SPARE SUPPLIERS:

This article, being a significant number, and being almost six years since I started this project----- is one that I thought I will bring some humor into your lives and remind you of the HELL that we all go through.

In 1982 a J2 owner, totally frustrated with one specific spares dealer, did some of his quality art-work and sent me the following cartoon:

I am not an expert at dealing with the dealers, but I have realized that they are the only ones that we have available to go to for those needed replacement or missing parts.

If you have ever questioned the term "OCTAGON HEAVEN" --- that was the garage out behind my home in Davenport, Iowa when I stored and worked on the little cars! Someday there will be another octagon heaven here in Maine!!
