HOOD REAR WINDOW

This is of a little question as to what is original.

No one seems sure!

		Center	left	right
Window width	A	15"	15"	15"
Window height	C	7"	7"	7"
Radius	D	2½"	4"	6"
Above bottom of hood line B		7"	7"	7"

Even the dimensions above are open for question!. The only thing that seems to be in agreement is that the rear window is 7" above the bottom of the hood and is 15" wide, and 7" high.
