### STEERING WHEEL RESTORATION

If your steering wheel needs to be re-worked here are some companies that claim to do this kind of work. I do not know anything about any of them so proceed on your own!

STEERING wheel restoration: full time since 1976, much of my work is recommendations from others, which speaks for itself, minor crack repairs in epoxy, start at \$130 to completion, complete rim circle remolding in hard rubber using my exclusive self-developed transplant system for about 2/3 the cost of plastic injection molding the others do. All work finished in color, spin-dried painting, oven cured, rim remolding covering most sizes with smooth conventional designs, including banjo stainless, chrome or rod type spokes with solid steel hub centers, including marine, commercial, cost range to completion: 16", \$225; 17", \$240; 18", \$250; 20", \$350; add \$12 handling, shipping, can return COD, please send SASE for information. I am author of Steering Wheel Restorations Handbook From Antique to Milestone (thousands sold, tells it all), should be in your library, \$12.95 first class, US 50 states, \$16.95 International, US funds only, sold also by Classic Motorbooks and The Eastwood Co. make payment and correspondence to: Jack Turpin, Peaceful Valley, Waterfalls Dr. Rt 2, Cleveland, GA 30528, PH: 404-865-2242.

### STEERING WHEEL RESTORATION

**BACKWARDS  
UNLIMITED**

We are highly skilled in the craft of restoring vintage steering wheels. We have been doing nothing but steering wheel restoration since 1975. Ask around and see if anyone else offers a full three-year guarantee against re-cracking. All work completed in durable butyrate plastic, not just painted. We take extra pride in every job. All work hand rubbed for a superior finish.

Most Steering Wheels From 1932-1957
