2802	" " " " (7/16 Whitworth)
2860	Tommy bar for ditto

} ? Not in list in original
"Instructional Manual"

The two grease guns were one for grease and one for gear oil.

The tappett spanner was for the eccentric rocker adjusters

The jack was a screw type

The special engine spanner was a single-ended ring spanner with a thin end to fit over the cylinder head nuts. It was about 5" long and was marked "cylinder head" on its shank.

There is a project for you true pure and "Original" nuts, collect the tool set for most of us don't have it!
