MORE ON THE HOOD

If you are willing to conclude with me from Technical article number 196 that the J2 hood had the small side curtains behind the door, then you are willing to look at the next piece of information, that being the layout of the hood.

I sure wish I had someone to provide a pattern for it would make the process much eazier.

Note: The lines in the photo show seams-- (a) and (b).

This means that the hood was cut in probably three pieces, sewn to form the shape. (see below)

Again I am looking for help!!.
