

#### ENGINE SIDE OF J2 FIREWALL

Note the arrangement of the petrol pipes  
(Models F1 & F2 had the carburettors & the petrolift on the passenger side with cutout/fusebox on the driver's side).

Only the serrated button is available  
as a separate item.

#### STARTER SWITCH

Fitted to models: D, J1, J2, J3, L1, L2, F2, K1, K2, KN, PA, PB, NA, NB, ND.

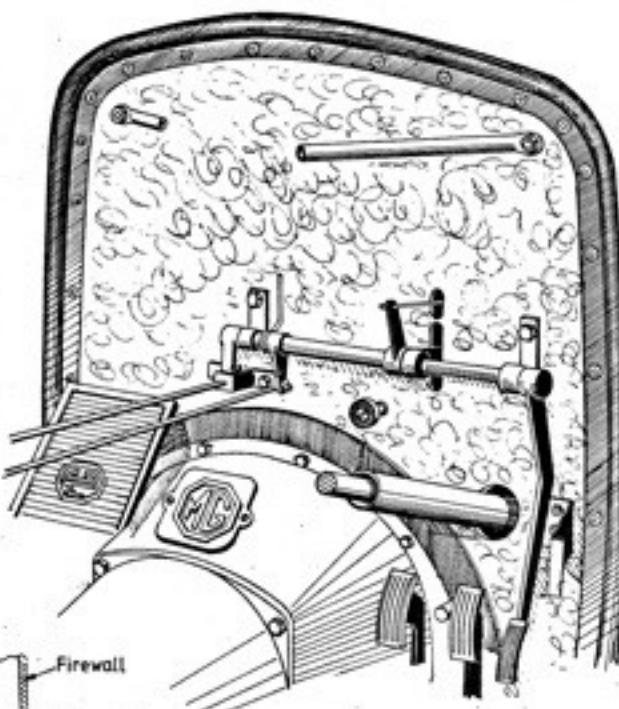

There are other starter switches very close in design to that shown which are quite suitable for use on MMM MG's.

Contrary to popular belief  
the crank handle was not  
clipped to the footside of  
the firewall, but was held  
by three clips to the body  
behind the seat squab.  
(See body drawing.)

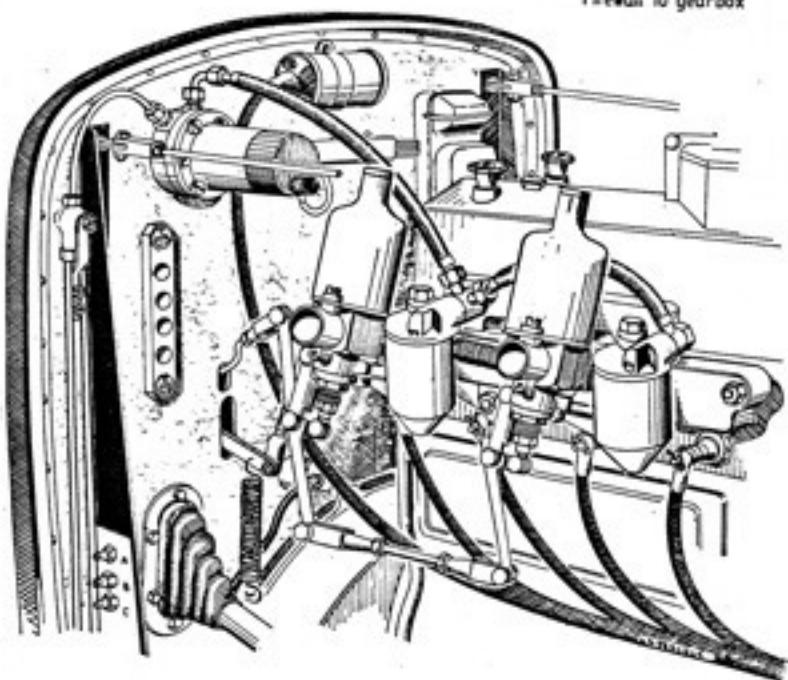

Section of original top firewall  
fume seal fitted to models:  
D J1 J2 J3 J4 F1 F2  
with 18 bifurcated rivets.

Fume seal for models:  
D J1 J2 J3 J4 F1 F2

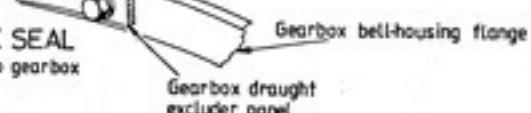

#### DRIVER'S SIDE OF J2 FIREWALL

#### ENGINE SIDE OF 'P' TYPE FIREWALL

For detailed photograph of many of the items shown here - see under relevant section of catalogue.

#### J2 FUME SEAL Firewall to gearbox
